WINDFORCE Baltic Sea

WAB and Offshore Wind Messe first launched the WINDFORCE Baltic Sea offshore wind energy conference in 2013.

The focus of this two-day event is the development of offshore wind in the Baltic region. The challenges facing offshore wind power production in the Baltic Sea differ greatly from those in the North Sea. Knowing that experience gained in other parts of the world can be extremely helpful in developing an offshore wind industry in the Baltic countries, we have organised sessions at our conference to cover themes ranging from the debate on policy-making to logistics, grid connection or financing. No other conference offers such a comprehensive overview of the latest developments in the countries bordering the Baltic: Denmark, Sweden, Finland, Poland, Estonia, Lithuania and Germany.

The following is an overview of the companies that participated at the WINDFORCE Baltic Sea conferences.
